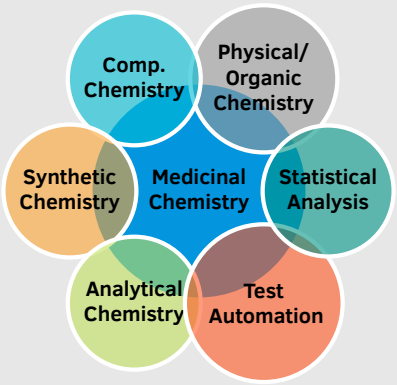
Skills



Interests

- Drug Design & Discovery
- Medicinal Chemistry
- Computational Biophysics
- Molecular Dynamics
- Pharmacology

Education

2014 - 2020 **PhD., Chemistry** — Memorial University
St. John's, NL, Canada
Supervisor: **Prof. Chris Rowley**
Specialization: Physical, Theoretical & Computational Chemistry

2010 - 2014 **BSc. (Hons), Chemistry** — Mount Allison University
Sackville, NB, Canada
First Class Honours with Distinction

Research Experience

2014 - Pres. **Graduate Research Assistant** — Dept. of Chemistry, Memorial University

- Developing new computational methods to predict the reactivity of druggable targets in proteins kinase enzymes.

Jan. - May 2019 **Visiting Researcher** — Centre for Chemical and Synthetic Biology, Uottawa

- Design, synthesis, and evaluation of targeted covalent inhibitors for human tissue transglutaminase enzyme.

May 2013 - Aug.2014 **Research Associate** — ChemGreen Innovation Inc.

- Explored the chemistry of free radical reactions in green solvents, particularly supercritical CO_2, and its applications.

Jan.2014 - May.2014 **Independent Student Researcher** — Metal Heads Research Group, MtA

- Special topics research project in inorganic chemistry under the supervision of Prof. Glen Briand of Mount Allison University. The project involved the synthesis of bismuth amine-thiol complexes and testing them for their catalytic properties.

May 2013 - Jul. 2013 **Research Scientist** — TRIUMF National Laboratory

- Worked with a team of research scientists at TRIUMF National Laboratory exploring muonium free radical chemistry in supercritical CO_2. This research was part of BSc. (Hons) thesis work.

Sept.2011 - Aug. 2012 **Research Assistant** — The Wild Toads Research Group, MtA

- Conducted experimental research work in Prof. Stephen Westcott's lab (Mount Allison University) investigating the synthesis and biological activity of novel Schiff-base compounds derived from long chain amines. Novel compounds were characterized using a suite of spectroscopic techniques and were tested for their potential as anti-fungal and antibacterial agents.
